

Quality Made in Germany since 1924

Grinding and polishing with ARTIFEX

Innovative tools with a tradition.

ARTIFEX - your metal and glass working partner

WHAT MAKES US SPECIAL

Founded in 1924 in Hamburg as a medium-sized, family-run company, ARTIFEX soon became popular with its domestic metal cleaning blocks. Today, we are one of the world's leading manufacturers of elastic bonded abrasives. With our global sales network, we advise customers all over the world when it comes to glass and metal-working.

ARTIFEX offers you quality "Made in Germany" and a fair price-performance ratio. As specialists in professional glass and metal-working, our consulting services cover the most varied industry sectors, ranging from the process industry, steel engineering and machine engineering through to the aerospace industry. Here we can rely on our almost 100 years of tradition paired with state-of-the art expertise.

HOW WE VIEW OURSELVES

In intense dialogue with our customers, machine manufacturers and application engineers, we face the challenges posed by new products and surfaces, develop the matching technologies and constantly expand our expertise. As a flexible medium-sized company, we are able to develop ideal solutions for our customers in a speedy and uncomplicated manner. In our laboratory, we research the perfect materials and shapes for a vast range of applications.

WHO WE ARE

We are passionate about finding specific solutions for our customers. Some of us have been working together for decades to achieve this. Every team member brings their own individual expert knowledge and focus on applications to the table. That's because it is only through teamwork that we are able to offer

the flexibility and the service our customers appreciate. When talking to our colleagues, you will notice that we offer much more than a classic consultation. We have made it our mission to engage with the needs of our customers with curiosity and expertise, each and every day.

WHAT WE PRODUCE

Our elastic polishing and grinding tools are used in the most varied sectors. In metal-working, they finish surfaces ranging from the most delicate surgical instruments through to heavy-duty turbine blades. When it comes to grinding flat glass edges, elastically bonded abrasives ensure unmatched brilliance and enable you to realise facades, furniture or bathroom furnishings at the highest level.

WHAT WE CAN DO FOR YOU

Our focus is on you as a user. Our versatile grinding and polishing tools are designed for the most varied surfaces. Please take a look at our specialist brochure on glass and metal-working. If you cannot find the right application for your requirements here, then please get in touch with us! We will gladly advise you on your premises and find the right, technically mature solution for you!

The ARTIFEX promise

We stand for tools that guarantee the highest quality standards. All ARTIFEX products are "Made in Germany" and their above-average service life speaks for itself.

Our service: You have individual requirements, we offer customised solutions regardless of the material, shape or dimensions. We will gladly advise you on your premises.
