

Our material compositions are as individual as your requirements. The ideal composition of polyurethane, resin or rubber with the corresponding grain guarantees the perfect result. Regardless of whether initial equipment, tools with a long service life, economic variants or special glass: you decide what you need, we have the matching series.

THE EXTRA-SHARP ONE: SERIES EK – S

The perfect choice for arris with diamond pre-grinding: white special fused aluminium oxide in resin bond polishes without negatively changing the arris geometry.

Good gloss
Appealing arris

ADVANTAGE

Universally applicable

For initial equipping, we fit out many single and double edgers of renowned manufacturers like Benteler, Busetti, Neptun or Forvet. Of course, we also provide alternative tools besides the OEM tools made to customer specifications for almost all machines.

The ARTIFEX promise

We stand for tools that guarantee the highest quality standards. All ARTIFEX products are „Made in Germany“ and their above-average service life speaks for itself.

Our service: You have individual requirements, we offer customised solutions regardless of the material, shape or dimensions. We will gladly advise you on your premises.
